

Animal Allies Vision Statement

Animal Allies Humane Society is a well-established, local nonprofit organization which works in partnership with city government to align the needs of homeless, abandoned and abused domestic animals with the community's need to prevent pet overpopulation, strays and disease in a humane and responsible manner. We will work to strengthen our relationships with city and county governments and to be responsive to changing community needs.

Animal Allies Humane Society commits to provide diverse quality services to our animal and human communities. We will provide a safe and healthy environment for homeless animals. We will sponsor low income spay and neuter assistance programs. We will offer health-checked, altered and temperament-tested animals for adoption and will screen and match adopters with suitable pets.

Animal Allies Humane Society seeks to expand its mission in our community through humane education in area classrooms and organizations. We will become a readily accessible crisis and informational resource. We will promote key animal issues by increasing our visibility in the community, participating in and supporting local events and causes.

Animal Allies Humane Society will fulfill these commitments by fostering a professional and compassionate staff and volunteer corps through training and continuing education. We will maintain a strong and supportive Board of Directors. We will create and maintain a flagship model shelter facility. When people think of animals, they will think of Animal Allies Humane Society.
